

## **Charlevoix Commitment on Defending Democracy from Foreign Threats**

We, the Leaders of the G7, share common democratic values that are central to the development of free, open, well-governed, pluralistic and prosperous societies and recognize that equality is a core component of democracy. These democratic values are essential for generating broad-based economic growth that benefits everyone, creates quality jobs and ensures opportunities for all.

Democracy and the rules-based international order are increasingly being challenged by authoritarianism and the defiance of international norms. In particular, foreign actors seek to undermine our democratic societies and institutions, our electoral processes, our sovereignty and our security. These malicious, multi-faceted and ever-evolving tactics constitute a serious strategic threat which we commit to confront together, working with other governments that share our democratic values. Defending democracy will require us to adopt a strategic approach that is consistent with universal human rights and fundamental freedoms, our international commitments to peace and security, and that promotes equality. We welcome the work of G7 Foreign and Security Ministers in Toronto to establish a common understanding of unacceptable actions by foreign actors with the malicious intent of undermining our countries' democratic systems as the basis for our collective and individual response.

We, the Leaders of the G7, commit to:

Respond to foreign threats, both together and individually, in order to meet the challenges facing our democracies.

Strengthen G7 cooperation to prevent, thwart and respond to malign interference by foreign actors aimed at undermining the democratic processes and the national interests of a G7 state.

Establish a G7 Rapid Response Mechanism to strengthen our coordination to identify and respond to diverse and evolving threats to our democracies, including through sharing information and analysis, and identifying opportunities for coordinated response.

Share lessons learned and best practices in collaboration with governments, civil society and the private sector that are developing related initiatives including those that promote free, independent and pluralistic media; fact-based information; and freedom of expression.

Engage directly with internet service providers and social media platforms regarding malicious misuse of information technology by foreign actors, with a particular focus on improving transparency regarding the use and seeking to prevent the illegal use of personal data and breaches of privacy.

Support public learning and civic awareness aimed at promoting critical thinking skills and media literacy on intentionally misleading information, and improving online security and safety.

In accordance with applicable laws, ensure a high level of transparency around sources of funding for political parties and all types of political advertising, especially during election campaigns.
